

TECHNICAL DATA SHEET

SF95 JEFFERSON METATARSAL BOOT

DESCRIPTION

The Jefferson boot features metatarsal protection technology that absorbs impact from falling objects, with a water resistant leather upper to keep feet dry. It has both steel toe cap and midsole protection, with an ultra hardwearing PU/rubber, HRO rated, anti-slip sole that is heat resistant up to 300°C making it ideal for demanding environments.

SIZES

UK 3-13

STANDARDS

EN20345 S3
M HRO SRC

KEY FEATURES

- Metatarsal impact protection technology
- Steel toe cap and midsole
- 300°C heat resistant, anti-slip, anti-static and fuel oil resistant PU/rubber sole
- Energy absorbing heel reduces foot fatigue

FEATURE ICONS

TECHNICAL DATA SHEET

MATERIALS

- Water resistant leather upper
- PU/rubber sole
- Steel toe cap
- Steel midsole

TYPICAL INDUSTRIES

- Agriculture & Landscaping
- Airport & Logistics
- Construction
- Engineering
- Rail
- Utilities

CERTIFICATION/MARKINGS

EN ISO 20345:2011 is an internationally recognised standard which specifies requirements for safety footwear. Any product which references an EN standard must have the relevant certification attributed to the product code found on the product.

The product standard can be found on the tongue label and should match that stated on the certification. The standard is usually a group of numbers and letters, for example S3 WR HRO SRC. These letters and numbers denote the characteristics that make up the footwear you are buying which include properties such as protective toe cap, water-resistant uppers, protective midsole, fuel oil resistance, anti-static, heat resistance and slip resistance.

Users are advised to select the required class of performance based on the risk assessment of the location and/or task as appropriate.
