WARNING

Pacemaker:

Magnets could affect the functioning of pacemakers and implanted heart defibrillators.

Magnetic Field:

Magnets produce a far-reaching strong magnetic field. They could damage TV's and laptops, computer hard drives, credit and ATM-cards, data storage, mechanical watches, hearing aids and speakers.

Postage:

Magnetic fields of improperly packaged magnets could cause disturbances in sorting machines and damage fragile goods in other packages.

- use a large box and place the magnet in the middle surrounded by lots of padding material
- Arrange magnets in a package in a way that the magnetic field neutralise each other
- If necessary, use sheet iron to shield the magnetic field
