P999 - Bayonet Fit Test Adapter Kit

Collection: Filters
Range: Respiratory Protection
: 1
Outer Carton: 1

Product information

Introducing the Portwest fit test adapter kit, compatible with all Portwest bayonet cartridge half masks and full face masks. This kit enables quantitative fit testing to be performed easily and accurately, providing confidence that the respirator fits the individual wearer. Position the adapter between the respirator facepiece and the P3 filter, and follow standard quantitative procedures using a Portacount particle counting device. The kit is supplied with an adapter, fitted with a small sample tube that passes through the inhalation valve of the respirator, taking a sample from the breathing zone, ensuring that you get reliable results. The fit test adapter should only be used with P3 filters.

Respiratory Protection

Introducing the new PW Safety range of Half Masks and Full Face Masks designed to offer the most comfortable and best fitting products in the marketplace. Conforming to EN standards EN136 (Full Face Masks) and EN140 (Half Masks). Complete with a full range of interchangeable filters.

Features

- Compatible with all Portwest bayonet filter masks
- Supplied in a durable carry case
- Connects to a portacount machine, enabling quantitative face fit testing
- The kit comprises of an adapter, sampling tube and a pair of P941 P3 filters
